

Streamlining IT Procurement

Automating Standard Laptop Orders with Flow Designer

Phase 2 - Requirement Analysis

Purpose: Identify the functional and non-functional requirements of the procurement automation project.

Section	Details
Functional Requirements	Create a laptop request, capture required details, trigger the workflow, route approvals, and create procurement tasks.
User Requirements	Users should be able to submit standard laptop requests with the required information.
Admin Requirements	Administrators should be able to manage the workflow, approvals, tasks, and request status.
Non-Functional Requirements	The process should be reliable, easy to use, maintainable, and provide clear status visibility.

Project Note: This phase document is prepared for organizing the TN Skills project evidence and can be supplemented with your actual screenshots/configuration details.
