

Technology Stack

Date	25 September 2026
Team ID	SWTID-2026-1063
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	ServiceNow Incident Form / ServiceNow UI	Provides the user interface for viewing and modifying Incident records. UI Policies and Client Scripts control the form dynamically.
2	Backend / Server-Side	ServiceNow Platform & JavaScript	ServiceNow provides the application platform, while JavaScript is used to create Client Scripts for validation and automatic field updates.
3	Database / Data Storage	ServiceNow Database	Stores Incident records and related configuration data used by the ServiceNow platform.
4	Cloud / Hosting / Deployment	ServiceNow Personal Developer Instance (PDI)	Provides the ServiceNow environment in which the Incident configurations are created, tested, and demonstrated.
5	Version Control & CI/CD	Not Applicable	The project does not require a separate CI/CD pipeline or version-control system for implementing the configurations in the ServiceNow PDI.
6	Third-Party APIs / Other Tools	Not Applicable	No external APIs or third-party services are required for the implementation.
