

BRAINSTORMING & IDEA PRIORITIZATION

Project Information

Date	25 September 2026
Team ID	SWTID-2026-1063
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

The team discussed different ways to improve Incident Management in ServiceNow. The ideas focused on dynamic field control, automation, validation, and preventing unwanted changes to Incident records.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Ajazkhan S	Make Assigned To mandatory for High Impact Incidents	UI Policy	1
2	Arunkumar K	Make Urgency read-only when Impact is High	UI Policy	1
3	Ajazkhan S	Automatically set Urgency to High when Impact is High	Client Script	2
4	Chavala Vishnu Kumar	Prevent saving a High Impact Incident when Assigned To is empty	Client Script	2
5	Chavala Vishnu Kumar	Prevent State changes through Incident list editing	Client Script	3
6	Arunkumar K	Allow Incident fields to return to normal when the condition becomes false	UI Policy	1

Group Classification

Group 1 – Incident Form Field Control

Ideas related to dynamically controlling Incident fields based on conditions.

Group 2 – Incident Automation and Validation

Ideas related to automatically updating values and validating information before an Incident is submitted.

Group 3 – Incident List Control

Ideas related to controlling unwanted modifications made directly through the Incident list.

Step 2: Idea Prioritization

The ideas were evaluated based on their feasibility and importance to Incident Management.

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	Dynamic Incident field control using UI Policies and UI Policy Actions	High	High	1	Yes
2	Incident automation and submission validation using Client Scripts	High	High	2	Yes
3	Controlled Incident State modification through list editing	High	Medium	3	Yes

Selected Concept

The selected concept is:

“Implement Client Scripts and UI Policies on the ServiceNow Incident table to provide dynamic field control, automatic value updates, submission validation, and controlled State modification.”

Expected Benefits

- Dynamic control of Incident fields.
- Automatic updating of Urgency.
- Mandatory validation for High Impact Incidents.
- Prevention of incomplete Incident submission.
- Prevention of unwanted State changes through list editing.
- Improved consistency of Incident records.

- Better user interaction with the Incident form.

Brainstorming Output

The brainstorming activity resulted in a single integrated ServiceNow solution combining UI Policies, UI Policy Actions, and Client Scripts for Incident Management.
